XAMPP is an easy to install Apache distribution containing MariaDB, PHP, and Perl. Just download and start the installer. It's that easy.

## XAMPP for Windows 8.0.25, 8.1.12 & 8.2.0

Version	Checksum	Size
8.0.25 / PHP 8.0.25	What's included? md5 sha1	<a href="#">Download (64 bit)</a> 143 Mb
8.1.12 / PHP 8.1.12	What's included? md5 sha1	<a href="#">Download (64 bit)</a> 147 Mb
8.2.0 / PHP 8.2.0	What's included? md5 sha1	<a href="#">Download (64 bit)</a> 148 Mb

Requirements > More Downloads >

Windows XP or 2003 are not supported. You can download a compatible version of XAMPP for these platforms [here](#).

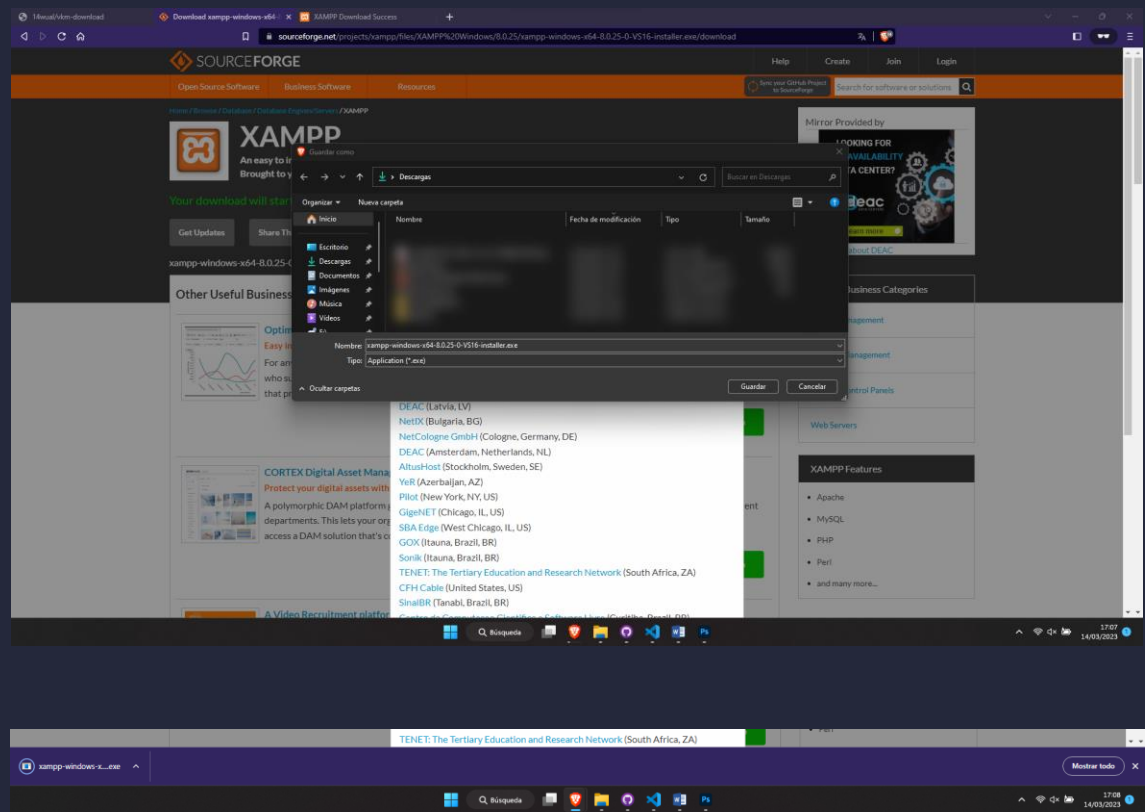

## XAMPP for Linux 8.0.25, 8.1.12 & 8.2.0

Version	Checksum	Size
8.0.25 / PHP 8.0.25	What's included? md5 sha1	<a href="#">Download (64 bit)</a> 152 Mb
8.1.12 / PHP 8.1.12	What's included? md5 sha1	<a href="#">Download (64 bit)</a> 152 Mb

### Documentation/FAQs

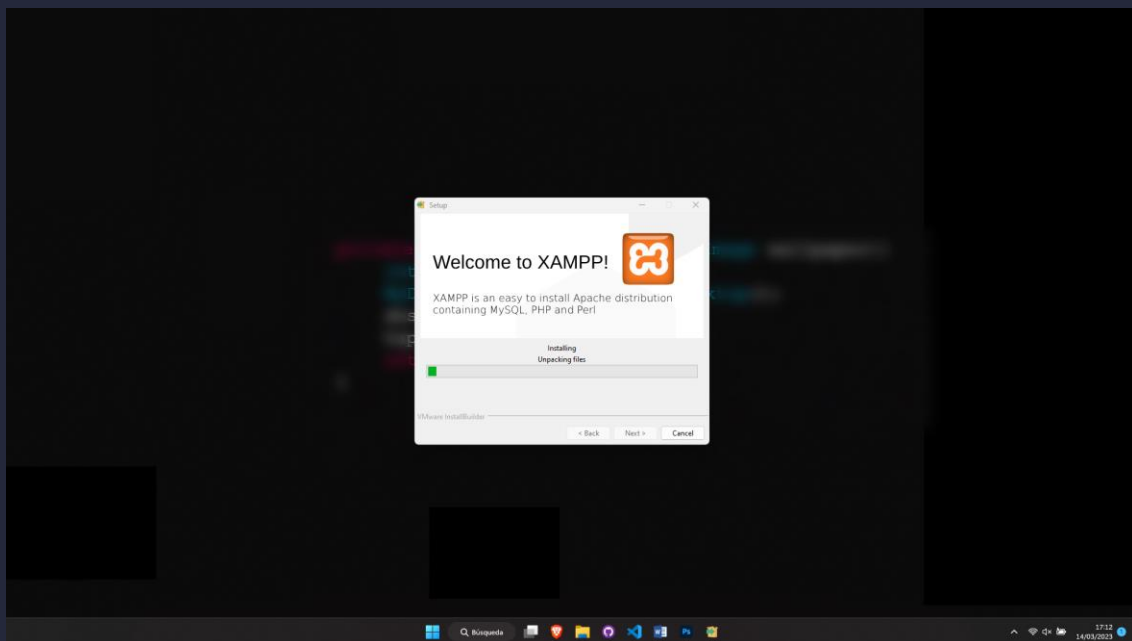

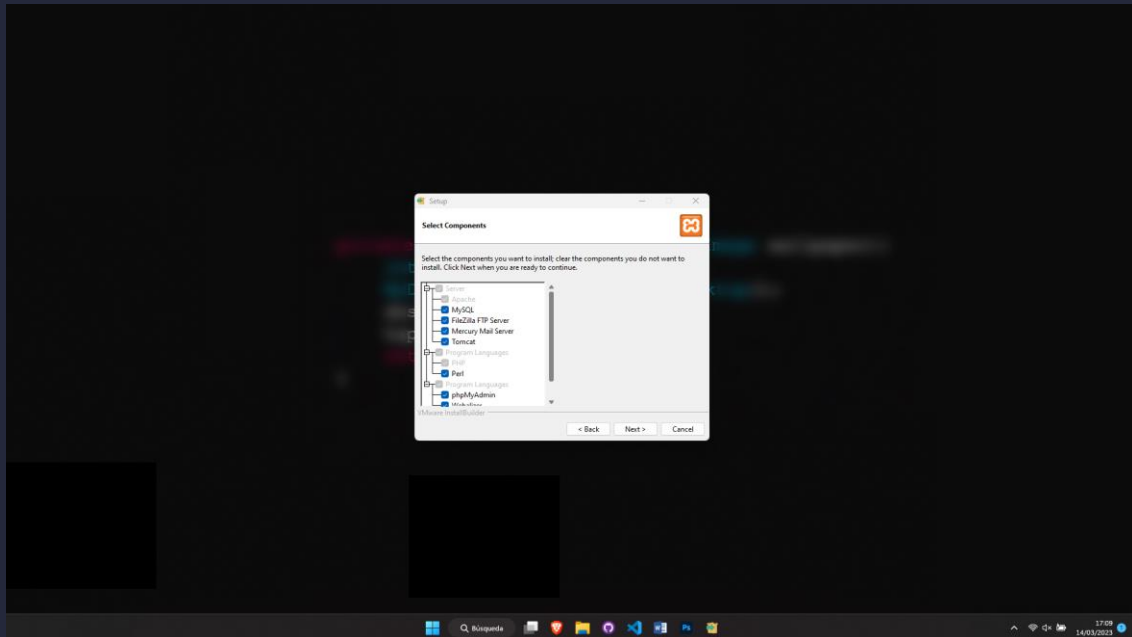

There is no real manual or handbook for XAMPP. We wrote the documentation in the form of FAQs. Have a burning question that's not answered here? Try the Forums or Stack Overflow.

Install XAMPP (Run the executable[.exe])

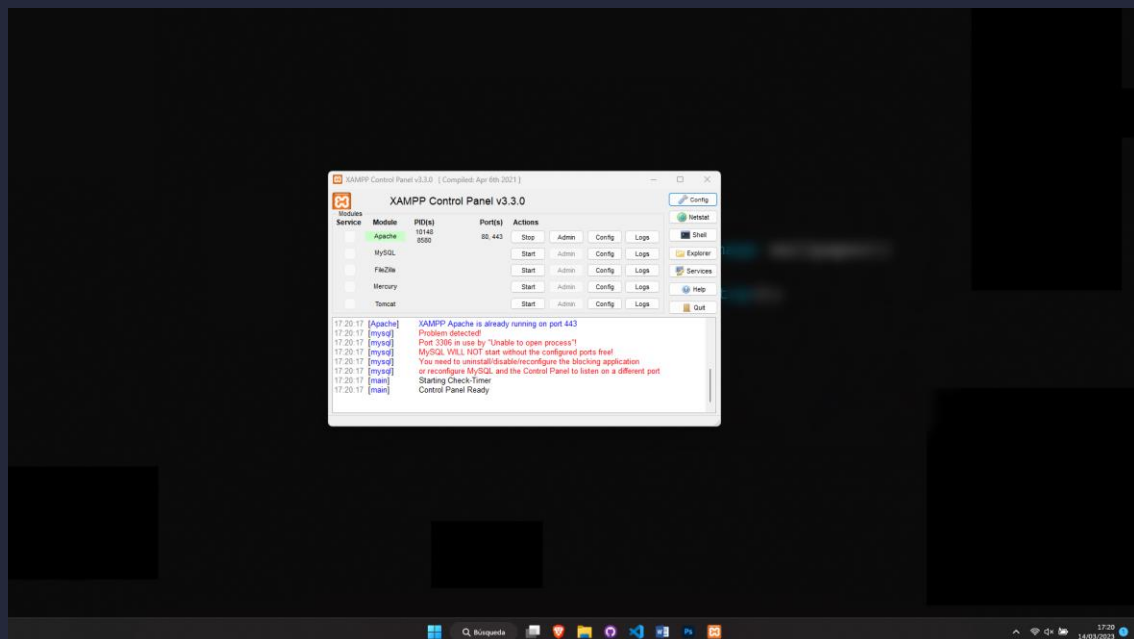

It is important to Install the Apache Service. comes by default

Extract and copy the vkm folder (located inside the previously downloaded zip) to xampp/htdocs. Its default path is: C:/xampp/htdocs.

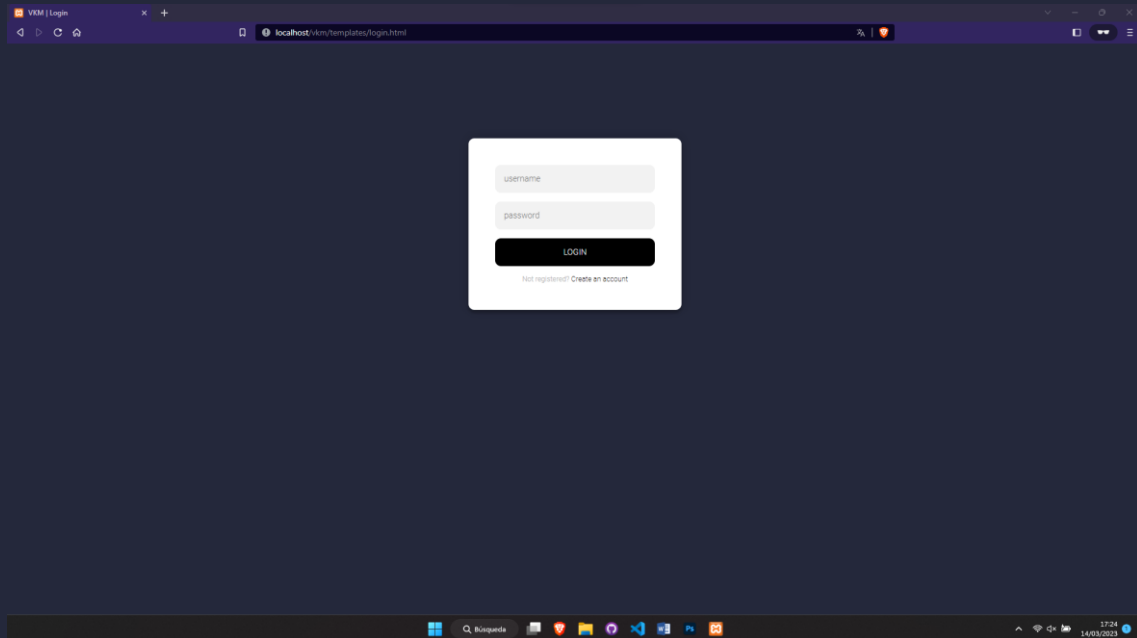

Turn on the Apache service in the XAMPP control center

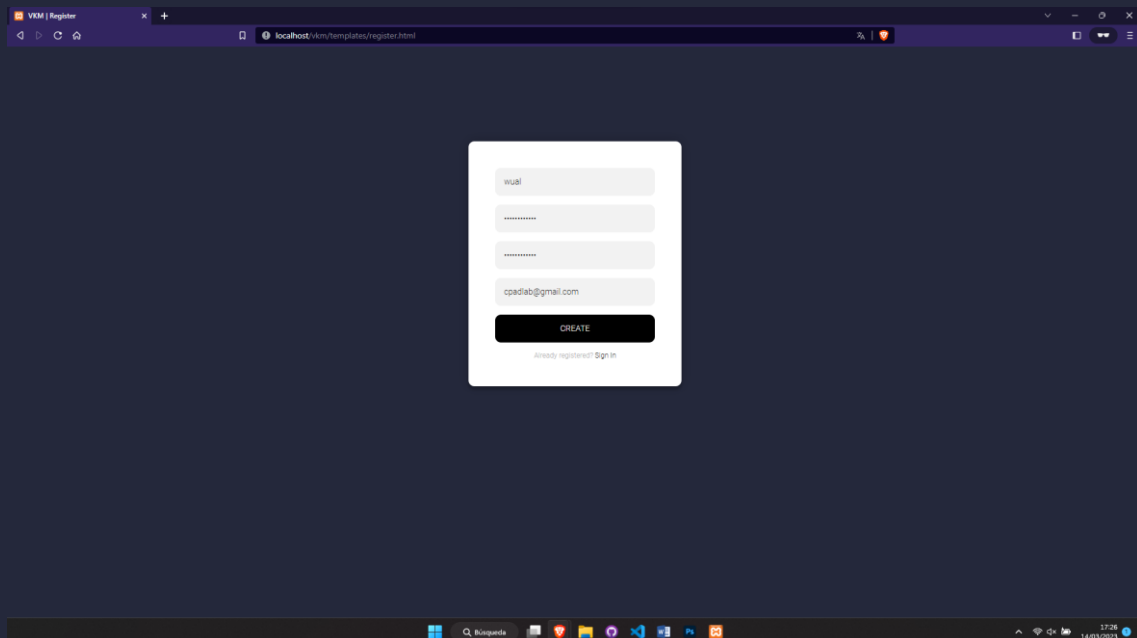

Enter your browser, and enter the following url: <http://localhost/vkm> or localhost/vkm

This will redirect you to the login panel.

*Note: the aesthetics of the windows may change in variation to different versions. Currently the help file is being made under an alpha version. But the functionality and the way to do it does not change.*

Go to the registration page and fill out the form. When finished, click register.

It will pop up an alert that you have successfully registered. By clicking accept you will be redirected to login. Log in and you will be inside!
